DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, drawn to Claims 4-12, 14-18 and 20-22; and

Species II, drawn to Claims 45 and 46.

NOTE: Species I does not require the specifics contemporaneously retaining first and second balls of solder and sequentially exposing the first and second solder balls, as required by Species II. Species II does not require the specifics of dipping the substrate into a volume of balls, as required by Species I.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species between Species I and Species II for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic between Species I and Species II.

2. If applicants elect the invention of Species I, this application contains claims directed to the following patentably distinct species of the claimed invention of Species I:

Species A, drawn to Figure 1, Claims 4 and 5;

Species B, drawn to Figure 5, Claims 7 and 21;

Species C, drawn to Figure 6, Claims 8 and 22; and

Species D, drawn to Figure 7, Claims 9-11.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of Species I for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 6, 12, 14, 15, 18 and 20 are generic to Species I only.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. A telephone call was made to Mr. Brent Kennedy on February 7, 2003, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3729

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dexter Tugbang whose telephone number is 703-308-7599. The examiner can normally be reached on Monday - Friday 9:00 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 703-308-1789.
